|  | Implicit Transaction Costs | -£1.51 | -£15.12 |
| Incidental costs | Impact of performance fee | N/A | N/A |

*costs incurred by us buying and selling your underlying investments
Transaction costs to purchase the ETF will be charged based on your broker's terms and conditions. Please speak with your broker to obtain this information.

## The Cumulative Effect of Costs on Return

The total charges deducted for each fund will have an impact on the investment return you might get. Whilst performance can't be guaranteed, we can give you examples of how the charges will affect what you might get back. This illustration assumes that costs occur evenly throughout the year, charges are paid out of the investment evenly throughout the year and that a net growth rate of $5 \%$ applies. The figures are estimates and may change.

In this example, charges (including implicit transaction costs) would reduce the amount your investment grows for one year by $0.23 \%$. Putting it another way, this would have the effect of bringing the illustrated investment growth down from $5 \%$ to $4.77 \%$. Please note that the year one figure includes one off costs that would not be applicable in subsequent years.

| $£ 10,000$ lump sum invested in this fund for 1 year with an assumed growth of $5 \%$ |  |
| :--- | :---: |
| Annualised Charges (\%) | $0.23 \%$ |
| Effect of charges on assumed growth rate of $5 \%$ | $4.77 \%$ |
| What you would get back at 5\% | $£ 10,500$ |
| Effect of charges on returns ( $£$ ) | $£ 10,477$ |
