

ABF Singapore Bond Index Fund

March 2025 Factsheet

Investment Objective

The Fund is an index fund which seeks investment results that correspond closely to the total return of the iBoxx ABF Singapore Index before fees and expenses.

The iBoxx ABF Singapore Index is an indicator of investment returns of debt obligations denominated in Singapore dollars issued or guaranteed by the government of Singapore or any government of People's Republic of China, Hong Kong SAR, Indonesia, Korea, Malaysia, Philippines or Thailand (collectively, the "Asian Governments"), by an agency or instrumentality of the Singapore government (or any other Asian Government), by a Singapore government (or any other Asian Government) sponsored entity or a quasi-Singapore government (or any other Asian Government) entity and Singapore dollar denominated debt obligations issued by supranational financial institutions.

² Weighted Average Yield to Maturity (%) is an average yield calculated by weighting each security presently held by the Fund at time of calculation with capitalisation and duration. Yield to Maturity and Yield to Call measures are used in the calculation for non-callable and callable bonds respectively. The figure is for reference only and would vary from time to time due to market conditions and it does not represent the fund/sub-fund's distribution yield or actual rate of return.

³ Weighted Average Duration (years) is an average duration weighted with capitalisation, and the figure is for reference only and would vary from time to time due to market conditions.

⁴ Cash is included in the calculation of the average credit rating and is rated as AAA regardless of currencies held. The credit ratings of the underlying fixed income securities are determined by S&P and/or Moody's, and where official credit ratings are unavailable, Nikko AM Asia's internal credit ratings are used.

Important Information

Key Risks

You should be aware that the price of Units can go down as well as up. The value of the Fund and its distributions (if any) may rise or fall. The following are key risk factors that may cause you to lose some or all of your investment:

Market and Credit Risks

- **Units may trade at prices other than NAV**
 - The secondary market price of Units may sometimes trade above or below the NAV per Unit. This deviation is dependent on various factors and will be accentuated when there is a large imbalance between market supply and demand for Units. There is a risk that you may not be able to buy or sell at a price close to the NAV per Unit.
- **You are exposed to market risk in Asia**
 - The Fund's NAV and trading prices will react to securities markets movements. You may lose money over short periods due to fluctuation in the Fund's NAV and trading price in response to market movements, and over longer periods during market downturns.

Liquidity Risks

- **You are exposed to liquidity risk**
 - The price at which portfolio securities may be purchased or sold by the Fund upon any rebalancing activities or otherwise and the value of the Units will be adversely affected if trading markets for the Fund's portfolio securities are limited or absent or if bid-offer spreads are wide.
- **You should be aware there is a minimum creation and redemption size**
 - Units will only be issued or redeemed in-kind in Creation Unit aggregations (currently 20,000,000 Units, and multiples thereof). Currently, Units will only be issued and redeemed for cash through Participating Dealers at a minimum of 50,000 Units on a Cash Dealing Day.
If you do not hold such minimum redemption number of Units (which is currently 50,000 Units), you may only be able to realise the value of your Units by selling your Units on the SGX-ST at the prevailing trading price.
 - However, do note that Participating Dealers are under no obligation to redeem your Units.
- **Trading in Units on SGX-ST may be suspended or even delisted**
 - You will not be able to purchase or sell Units on the SGX-ST during any period that the SGX-ST suspends trading in the Units. The SGX-ST may suspend the trading of Units whenever the SGX-ST determines that it is appropriate in the interests of a fair and orderly market to protect investors.
The creation and redemption of Creation Units may also be suspended if the trading of Units on the SGX-ST is suspended.
 - The Fund may not be able to continue to meet the requirements necessary to maintain listing of Units on the SGX-ST. The Fund may be terminated if Units are delisted from the SGX-ST.

Product Specific Risks

- **You are exposed to tracking error risk**
 - Changes in the NAV of the Fund are unlikely to replicate exactly changes in the Index due to various factors. The Fund's returns may therefore deviate from those of the Index.
- **Risk associated with the investment strategy of the Fund/Lack of discretion by Manager to adapt to market**
 - Unlike many conventional unit trusts, the Fund is not "actively managed". Therefore, the Fund will not adjust the composition of its portfolio except in order to seek to closely correspond to the duration and total return of the Index. The Fund does not try to "beat" the market it tracks and does not seek temporary defensive positions when markets decline or is judged to be overvalued. Accordingly, a fall in the Index may result in a corresponding fall in the NAV of the Fund.
- **You are exposed to emerging market risk**
 - The Fund may invest in securities issued by certain Asian Governments whose economies are considered to be emerging markets which are subject to special risks associated with foreign investment in such markets.

You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.
